DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, 29-52, drawn to polypeptides comprising fragments of Saposin B, methods of use, pharmaceutical compositions, and fusion proteins.

Group II, claim(s) 24 and 25, drawn to an isolated protein that binds to Saposin B.

Group III, claim(s) 26-28, drawn to an antibody that binds to Saposin B or to polypeptides comprising fragments of Saposin B.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each invention group has a separate and different technical feature because each invention group is drawn to separate and distinct products. Furthermore, there is no provision under PCT Rule 13.1 for the examination of more than one product. The technical feature of group I is that of a polypeptide comprising fragments of Saposin B. The technical feature of group II is that of a protein that binds to Saposin B, for example a Saposin B receptor. The technical feature of group III is that of an antibody that binds to Saposin B or to polypeptides that comprise fragments of Saposin B.
